Make things happen. Mechanical engineers design, build and maintain complex machines and mechanical systems from the very small to the very large scale. Learn the finer points of engineering and machine design, fluid mechanics, and production engineering which will enable you to make systems and machinery for diverse industries from transport to medical devices.

In this program you will:

- Learn to use mathematical and scientific principles to solve a range of technical problems
- Get hands-on experience through 12 weeks of work experience
- Experience a broad array of courses covering areas like design, sustainability, modelling and management and leadership
- Manage a major final-year research project on a topic of your choice
- Learn from industry professionals through guest lectures that expose you to current engineering professional practice
- Recreate interactive real-life scenarios in UniSC's state-of-the-art visualisation studio and dedicated engineering laboratories
